

Pleo Vivid-T Top View LED Strip light

Description

The PLEO VIVID-T series is a dedicated-colour LED strip designed for consistent, high-impact output across a range of static colour applications. With 140 SMD LEDs per metre and a power draw of just 9.6W, it offers strong, uniform brightness in Red, Blue, Green, or Yellow. The strip operates at 24V and is dimmable when paired with suitable drivers. Rated IP67 and built for durability, the VIVID-T performs reliably in both indoor and outdoor environments. It can be cut in 50mm increments and delivers a 165° beam angle, making it well suited for signage, facade edges, outlines, and other colour-driven features that benefit from clear definition and sharp lines. Supplied with mounting clips and backed by a three year warranty, the PLEO VIVID-T series is a dependable solution for projects that call for fixed-colour lighting with clean performance and minimal maintenance.

Specification Features

Input Voltage:	24V			
Power (W):	9.6W			
IP rating (IP):	IP67			
LED type:	SMD			
Colour Options:	Red, Blue, Green & Yellow			
LEDs per Metre:	140			
Cutting Length:	50mm			
lm/W:	Red	Blue	Green	Yellow
	36.9lm	21.6lm	66.6lm	63lm
Continuous Run:	5m Max (One end driver feed)			
	10m Max (Two end driver feed)			
Beam angle (°):	165°			
Dimmable:	Yes			
<i>Requires a driver</i>				

Item No.	Variant			
	Red	Blue	Green	Yellow
