

Evac D63 SM LED Surface Mounted Emergency Light

Description

The EVAC D63 Recessed and Surface Mounted LED Emergency Light features LED technology providing an energy efficient light source with high output, which is ideal for a range of emergency lighting applications. Featuring a polarity reversal protection switch mode for the battery, making it ideal for jobs which have not been completed yet which require the power to be turned off from the mains. Available in White and Black colour options. Complete with adaptor plate for larger holes. Ideal for commercial and interior applications such as apartments, shopping centres, hospitality etc.
