

Keel

Bollard Light

Description

KEEL Series Exterior Bollard Light delivers a durable and refined lighting solution for commercial landscapes, resort pathways, public spaces and residential gardens. Built from premium 6061 and ADC12 aluminium with a black C3 powder-coated finish, it is designed to maintain its appearance and performance in harsh outdoor conditions, including coastal environments.

Available in both 600mm and 1000mm heights, the KEEL Series offers flexibility to suit a wide range of projects. Choose between a contemporary flat-top or classic round-top design to complement the surrounding architecture and landscape.

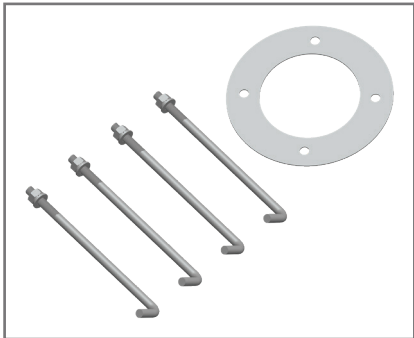

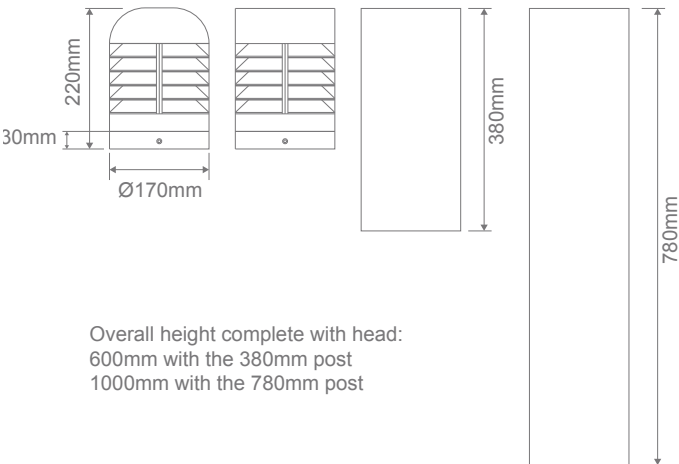

Its robust construction makes it well suited to high-traffic areas where reliability matters. Compatible with most high-power E27 LED lamps, it allows easy lamp selection to achieve the desired light output and atmosphere. For installations into wet concrete, an optional rag bolt assembly kit is available to simplify mounting and provide a secure foundation. A practical choice for projects that demand long-term durability, clean design and dependable outdoor performance.

Specification Features

Input Voltage:	240V
IP rating (IP):	IP65
