Plex-COB TW IP67

Tuneable White LED Strip

Description

The PLEX-COB-TW series of LED strip incorporates the latest in LED COB chip technology, with true dotless appearance utilising 840 LEDs per metre. Operating on 24V DC allows for less resistive heat and longer run lengths. Choose from IP54 Indoor Strip including wet areas, or for waterproof installations, the IP67 Strip with silicon coating. Longer areas of weldless joints provide a more reliable solution avoiding breaks in continuity. Available in 20W per metre, which provides a bright and desirable light output for your desired area. The PLEX-COB-TW series comes with Tuneable White, which offers a selection of White colours from Warm White to White, with the use of a 5 Channel RGBTW Controller and LED Driver. Ideal for kitchens, bathrooms, laundry, bars, restaurants, and all indoor highlighting applications such as pelmet lighting.
